SUBJECT INDEX

Acceptor GICs
charge transfer in, 399
Alkali doping
of α-Fe/graphite–Fe catalysts, 713
Alkali hydrides
GICs; electronic properties, 563
Alkali metal
–GICs, low temperature hydrogen absorption on, after ammoniation, 701
–graphite compound $K_{1-x}Rb_xC_8$, local structure in ternary, studied by X-ray absorption, 261
Alkali metal hydrides
GICs with, synthesis, crystallographic study and electrical conductivity of, 27
Alkali-metal vapor-transport technique
high stage GICs of rare earth metals and, 53
Alkaline earth metal
–ammonia compounds, new ternary, 41
Alloys
graphite–Cs–As lamellar, structural study of two, (stages 1 and 2), 249
Aluminium
conduction carriers spin resonance experiments in $AlCl_3$–GICs stage 2 reveal order–disorder phase transition, 557
electrointercalation of tetrahedral $AlCl_4^-$ and $GaCl_4^-$ anions into graphite, 79
Ammonia
alkaline earth metal–ammonia compounds, new ternary, 41
and ammonium, intercalation of, into host lattices with layered structures, 665
Anisotropic superconductivity
in C_4KHg–GICs, 449
Antimony
Cs–Sb and Cs–As intercalated graphite; synthesis and reaction mechanisms, 9
graphite–Cs–Sb intercalation compounds, phase transitions above room temperature in first stage, 365
graphite–Cs–Sb phases, structure of intercalated metallic sheets in lamellar, 255
$SbCl_5$ GICs, in-plane structure of stage-2, 193
$SbCl_5$ intercalated graphite
structure, c-axis resistivity, and p–T phase diagrams, 187
ultrasonic investigations of kinetics of ordering in, 335
Arsenic
effect of microcrystalline structure on transport properties of pristine and AsF_5-intercalated, highly-oriented, 491
electronic structure of AsF_5-intercalated graphite from de Haas–van Alphen measurements, 381
ESR studies of AsF_5/GICs; comparison of intercalated HOPG and C fibers, 549
structural study of two graphite–Cs–As lamellar alloys (stages 1 and 2), 249
structure and dynamics of C_8AsF_5; neutron scattering study, 353
synthesis and reaction mechanisms; Cs–Sb and Cs–As intercalated graphite, 9
c-Axis lattice expansion
in ternary intercalated layered solids, 243
c-Axis resistance
of $HgCl_2$ intercalated graphite as function of temperature and pressure, 485
c-Axis resistivity
of $SbCl_5$ intercalated graphite, 187

Band structure(s)
of LiC_6 from inelastic synchrotron X-ray scattering, 423
of ternary intercalation compounds C_8KH_x, 429
Barium
effect of Cs and Ba adsorption on electronic properties of C films adsorbed on metals (Ir, Re), 497
NMR studies of fluorinated $YBa_2Cu_3O_x$ samples, possible origins of high temperature superconductivity by; teaching for graphite compounds, 461
Bi-intercalation compounds
fluoride/fluoride and fluoride/sulfuric acid graphite, 109
transport studies on some metal chloride intercalated graphite and corresponding, 473
Bismuth
CsBi–GICs, ^{133}Cs NMR studies on first-stage, 577

©Elsevier Sequoia/Printed in The Netherlands

Bromine
graphite–Br intercalation compounds, pressure-induced phase transitions of, 359
intercalated graphite fibers, effect of length and diameter on resistivity of, 745

Cadmium
$Mn(pyr)(aq)^{2+}$ and pyridine intercalated $Cd_2P_2S_6$ lattices; mechanism of intercalation and perturbation of host lattice, 653
Carbon fibers
comparison of intercalated HOPG and, ESR studies of AsF_5/GICs, 549
GIC formation in neutral aqueous electrolytes; undesired side-reaction during electrochemical surface oxidation of highly-oriented, 719
intercalated pitch mesophase, tensile properties of, 733
lowering conductivity of, by fluorination, 725
Carbon fibers electrode
Li secondary battery and electric double layer capacitor using, 739
Carbon films
effect of Cs and Ba adsorption on electronic properties of, adsorbed on metals (Ir, Re), 497
Catalysts
alkali doping of α-Fe/graphite–Fe catalysts, 713
Cesium
CsBi–GICs, ^{133}Cs NMR studies on first-stage, 577
Cs–Sb and Cs–As intercalated graphite; synthesis and reaction mechanisms, 9
effect of Cs and Ba adsorption on electronic properties of C films adsorbed on metals (Ir, Re), 497
graphite–Cs–As lamellar alloys (stages 1 and 2), structural study of two, 249
graphite–Cs–Sb intercalation compounds, phase transitions above room temperature in first stage, 365
graphite–Cs–Sb phases, structure of intercalated metallic sheets in lamellar, 255
high temperature physintercalation into 2nd stage CsC_{24}, 59
intercalated graphite, nature of empty states in, 411
Chalocogenides
guest–host interactions in hydrated layered, as studied by NMR chemical shift anisotropy, 659
Charge density wave
phasing of, onto lattice in 1T-TaS_2, 635
Charge transfer
in acceptors GICs, 399
in ICl– and IBr–GICs, ^{129}I-Mössbauer study of, 405
Chemical oxidation
potential survey of intercalation of sulfuric acid into graphite by, 139
Chemical reduction
of GICs of metallic fluorides, 97
Cobalt
$CoCl_2$ in graphite; spin fluctuations and excitations in 2D XY-ferromagnet, 505
$CoCl_2$ intercalated in graphite, magnetism of, studied by elastic and inelastic neutron scattering, 513
graphite–Co compound, structure of electrochemical reduced, 267
Computer simulations
X-ray diffraction and, for partially disordered systems, 165
Conducting polymers
and intercalation, 617
Conduction carriers
spin resonance experiments in $AlCl_3$–GICs stage 2 reveal order–disorder phase transition, 557
Conductivity
of C fibers, lowering, by fluorination, 725
of electrochemically intercalated pyrographite, in-plane, 467
Conductors
quasi-two-dimensional, theory of de Haas–van Alphen effect in, 393
Copper
$CuCl_2$–GIC, de Haas–van Alphen effect in, 387
NMR studies of fluorinated $YBa_2Cu_3O_x$ samples, possible origins of high temperature superconductivity by: teaching for graphite compounds, 461
Correction factor
new, for X-ray intensities in structural investigations of GICs, 285
Crystallographic study
of GICs with alkali metal hydrides, 27

de Haas–van Alphen effect
in quasi-two-dimensional conductors, theory of, 393

in stage 2 $CuCl_2$–GIC, 387
de Haas–van Alphen measurements
electronic structure of AsF_5 intercalated graphite from, 381
Deuterium
formulation of isotherms for low-temperature absorption of H_2 and D_2 on KC_{24} prepared from natural graphite, 329
Disordered systems
X-ray diffraction and computer simulations for partially, 165
Dynamics
of C_8AsF_5, structure and; neutron scattering study, 353

Electrical conductivity
of GICs with alkali metal hydrides, 27
Electrical properties
of p-doped highly-oriented polyacetylene, 671
Electric double layer capacitor
using C fibers electrode, Li secondary battery and, 739
Electrochemical GIC sensor
for charge stored in lead acid battery, 707
Electrochemical reduction
of GICs of metallic fluorides, 97
Electrochemical surface oxidation
of highly-oriented C fibres, undesired side-reaction during; GIC formation in neutral aqueous electrolytes, 719
Electrointercalation
of Ag into 2H-TaS_2; *in situ* observation of reaction, equilibration and homogenisation, 629
of tetrahedral $AlCl_4^-$ and $GaCl_4^-$ anions into graphite, 79
Electronic properties
of C films adsorbed on metals (Ir, Re), effect of Cs and Ba adsorption on, 497
Electronic structure
of AsF_5 intercalated graphite from de Haas–van Alphen measurements, 381
Electronic studies
of alkali-hydrides GICs, 563
Ellipsometry
of graphite and C_8K intercalation compound between 5 and 30 eV, 417
Empty states
in Cs intercalated graphite, nature of, 411
Entropy
thermodynamic conditions of intercalation; role of temperature and, 21

ESR studies
of AsF_5/GICs; comparison of intercalated HOPG and C fibers, 549
EXAFS studies
and chemical synthesis; layered double hydroxides pillared by polyoxometalate anions, 609

Fermi surface
of GICs, magneto-quantum and topological studies on, 373
Ferromagnet
spin fluctuations and excitations in 2D XY-; $CoCl_2$ in graphite, 505
Fluorides
fluoride/fluoride and fluoride/sulfuric acid graphite bi-intercalation compounds, 109
W oxide fluoride and W fluoride–GICs, preparation and characterization of, 103
Fluorination
lowering conductivity of C fibers by, 725
Fluorine
fluoride or F–GICs, structural factors on stability of, 237
and fluorides, novel aspects of graphite intercalation by, and new B/C, C/N and B/C/N materials based on graphite network, 1
Formation
of GICs from trichloroacetic acid and trichloroacetic acid chloride solutions containing Mo compounds, 145
of graphite oxide, 157

Gallium
electrointercalation of tetrahedral $AlCl_4^-$ and $GaCl_4^-$ anions into graphite, 79
structural variations of highly-oriented polyacetylene upon doping with $GaCl_4^-$, 677
Gold
X-ray absorption spectroscopy and X-ray diffraction of $AuCl_3$–graphite, 217
Graphite
alkali doping of α-Fe/graphite–Fe catalysts, 713
alkali metal–, compound $K_{1-x}Rb_xC_8$, local structure in ternary, studied by X-ray absorption, 261
AsF_5 intercalated, electronic structure of, from de Haas–van Alphen measurements, 381
$AuCl_3$–, X-ray absorption spectroscopy and X-ray diffraction of, 217

bi-intercalation compounds, fluoride/fluoride and fluoride/sulfuric acid, 109
–Br intercalation compounds, pressure-induced phase transitions of, 359
and C_8K intercalation compound, ellipsometry of, between 5 and 30 eV, 417
$CoCl_2$ in; spin fluctuations and excitations in 2D XY-ferromagnet, 505
–Co compound, structure of electrochemical reduced, 267
–Cs–As lamellar alloys (stages 1 and 2), structural study of two, 249
Cs intercalated, nature of empty states in, 411
Cs–Sb and Cs–As intercalated; synthesis and reaction mechanisms, 9
–Cs–Sb intercalation compounds, phase transitions above room temperature in first stage, 365
–Cs–Sb phases, structure of intercalated metallic sheets in lamellar, 255
electrointercalation of tetrahedral $AlCl_4^-$ and $GaCl_4^-$ anions into, 79
formulation of isotherms for low-temperature absorption of H_2 and D_2 on KC_{24} prepared from natural, 329
and GICs under pressure; Raman modes, optical reflectivity, and phase changes, 293
$HgCl_2$ intercalated, *c*-axis resistance of, as function of temperature and pressure, 485
hydrous nitrate melts with, reactions of, 121
/In chloride/Cl system; threshold pressures and intercalate nucleation, 91
intercalation
by F and fluorides, novel aspects of, and new B/C, C/N and B/C/N materials based on graphite network, 1
of Mo oxide nitrate in, 127
magnetism of $CoCl_2$ intercalated in, studied by elastic and inelastic neutron scattering, 513
metal chloride intercalated, and corresponding bi-intercalation compounds, transport studies on some, 473
potential survey of intercalation of sulfuric acid into, by chemical oxidation, 139
preparation and properties of vapor grown, 151
$SbCl_5$ intercalated
structure, *c*-axis resistivity, and p–T phase diagrams of, 187
ultrasonic intestigations of kinetics of ordering in, 335
staging in intercalation of metal chlorides in, 67
transport properties of pristine and AsF_5-intercalated, highly-oriented, pyrolytic, effect of microcrystalline structure on, 491
Graphite compounds
teaching for; possible origins of high temperature superconductivity by NMR studies of fluorinated $YBa_2Cu_3O_x$ samples, 461
Graphite fibers
Br intercalated, effect of length and diameter on resistivity of, 745
Graphite intercalation compounds (GICs)
$AlCl_3$–, stage 2, conduction carriers spin resonance experiments in, reveal order–disorder phase transition, 557
alkali hydrides; electronic studies, 563
with alkali metal hydrides; synthesis, crystallographic study and electrical conductivity of, 27
alkali metal–, low temperature hydrogen absorption on, after ammoniation, 701
AsF_5/, ESR studies of; comparison of intercalated HOPG and C fibers, 549
charge transfer in acceptor, 399
C_4KHg–, anisotropic superconductivity in, 449
^{13}C NMR on, new results in, 569
correction factor for X-ray intensities in structural investigations of, new, 285
$CuCl_2$–, de Haas–van Alphen effect in stage 2, 387
$FeCl_3$, low field Hall effect in, 479
fluoride or F–, structural factors on stability of, 237
formation
in neutral aqueous electrolytes; undesired side-reaction during electrochemical surface oxidation of highly-oriented C fibres, 719
from trichloroacetic acid and trichloroacetic acid chloride solutions containing Mo compounds, 145
graphite and, under pressure; Raman modes, optical reflectivity, and phase changes, 293
high stage hetero-structure, in acceptor ($MoCl_5$) and donor (K) ternary systems, 205

H_2SO_4–,
kinetics of staging transition in, 315
in situ observation of X-ray diffraction in synthesis of, 341
ICl– and IBr–, ^{129}I-Mössbauer study of charge transfer in, 405
interlayer spacing and lattice-gas melting of ternary, 307
in Japan, research activities on chemistry of, 691
lattice dynamics of alkali, 347
Li, tritium behavior in neutron irradiated, 695
with Li, Na and K
superconductivity of, 455
synthesis, stability and structure of, 47
Madelung energy and Madelung constant of real and of hypothetical first stage, 279
magnetic acceptor, transport properties in, 537
magneto-quantum and topological studies on Fermi surface of, 373
metal chloride–,
nucleation process of, 85
structural characteristics, 223
structure of stage-1 and stage-2, 211
metal halide, preparation of, by intercalate exchange, 73
of metallic fluorides, chemical and electrochemical reduction of, 97
$NiCl_2$
magnetic behaviour of stage-1, 525
magnetic properties of first-stage, 531; of stage-1, 519
of $PdCl_2$; structural investigations, 199
perchloric acid and sulfuric acid, hydrolysis of, 133
P fluoride, ^{19}F NMR on stage-2, 583
of rare earth metals, high stage, and alkali-metal vapor-transport technique, 53
Rb, kinetics of first-order transition in stage 1, 323
$SbCl_5$, in-plane structure of stage-2, 193
sensor for charge stored in lead acid battery, electrochemical, 707
Sn fluoride–, local environment of Sn in, 231
staging disorder in, 273
surface structure of, resolved in real space by scanning tunneling microscopy, 175
W oxide fluoride and W fluoride–, preparation and characterization of, 103
Graphite nitrate compounds
graphite–N_2O_5 system, 115
Graphite oxide
formation of, 157
Guest–host interactions
in hydrated layered chalcogenides as studied by NMR chemical shift anisotropy, 659

Hall effect
low field, in $FeCl_3$ GICs, 479
HOPG
comparison of intercalated, and C fibers; ESR studies of AsF_5/GICs, 549
Host lattice(s)
intercalation of ammonia and ammonium into, with layered structures, 665
$Mn(pyr)(aq)^{2+}$ and pyridine intercalated $Cd_2P_2S_6$ lattices; mechanism of intercalation and perturbation of, 653
Hydrogen
formulation of isotherms for low-temperature absorption of H_2 and D_2 on KC_{24} prepared from natural graphite, 329
Hydrogen absorption
low temperature, on alkali metal–GICs after ammoniation, 701
Hydrolysis
of perchloric acid and sulfuric acid GICs, 133
Hydrous nitrate melts
with graphite, reactions of, 121

Indium
nuclear quadrupolar interaction of ^{111}In(EC)^{111}Cd and ^{181}HF(β^-)^{181}Ta in intercalation compound In_xTaS_2, 647
system graphite/In chloride/Cl; threshold pressures and intercalate nucleation, 91
Inelastic synchrotron X-ray scattering
information about band structure of LiC_6 from, 423
Infrared-active modes
of pyrolytic graphite (HOPG) and K–HOPG intercalation compound, polarization dependence of, 443
Infrared spectroscopy
measurement of intercalant vibrations using Raman and, 437
Intercalant vibrations
using Raman and infrared spectroscopies, measurement of, 437
Intercalate exchange
preparation of metal halide GICs by, 73
Intercalate nucleation
system graphite/In chloride/Cl; threshold pressures and, 91

Intercalated layered solids
c-axis lattice expansion in ternary, 243
Intercalated metallic sheets
structure of, in lamellar graphite–Cs–Sb phases, 255
Intercalation
of ammonia and ammonium into host lattices with layered structures, 665
conducting polymers and, 617
of metal chlorides in graphite, staging in, 67
$Mn(pyr)(aq)^{2+}$ and pyridine intercalated $Cd_2P_2S_6$ lattices; mechanism of intercalation and perturbation of host lattice, 653
of Mo oxide nitrate in graphite, 127
of sulfuric acid into graphite by chemical oxidation, potential survey of, 139
thermodynamic conditions of; role of temperature and entropy, 21
Intercalation channels
in Ag–TiS_2, 623
Intercalation compound(s)
C_8KH_x, band structures of ternary, 429
ellipsometry of graphite and C_8K, between 5 and 30 eV, 417
graphite–Br, pressure-induced phase transitions of, 359
graphite–Cs–Sb, phase transitions above room temperature in first stage, 365
In_xTaS_2, nuclear quadrupole interaction of $^{111}In(EC)^{111}Cd$ and $^{181}HF(\beta^-)^{181}Ta$ in, 647
K–HOPG, polarization dependence of IR-active modes of pyrolytic graphite (HOPG) and, 443
transport properties of magnetic, 543
Intercalation reactions
in molten salt systems, 15
Interlayer spacing
and lattice-gas melting of ternary GICs, 307
Iodine
^{129}I-Mössbauer study of charge transfer in ICl– and IBr–GICs, 405
Iridium
effect of Cs and Ba adsorption on electronic properties of C films adsorbed on metals (Ir, Re), 497
Iron
alkali doping of α-Fe/graphite–Fe catalysts, 713
$FeCl_3$ GICs, low field Hall effect in, 479
Isotherms
formulation of, for low-temperature absorption of H_2 and D_2 on KC_{24} prepared from natural graphite, 329

Kinetics
of first-order transition in stage 1 Rb GIC, 323
of ordering in $SbCl_5$-intercalated graphite, ultrasonic investigations, 335
of staging transition in H_2SO_4–GICs, 315

Lattice dynamics
of alkali GICs, 347
Lattice-gas melting
interlayer spacing and, of ternary GICs, 307
Layered double hydroxides
pillared by polyoxometalate anions; EXAFS studies and chemical synthesis, 609
Lead acid battery
electrochemical GIC sensor for charge stored in, 707
Lithiation
of 1T-TaS_2, chemical, *in situ* study of, 641
Lithium
band structure of LiC_6 from inelastic synchrotron X-ray scattering, 423
spin-lattice relaxation of ^8Li in LiC_{12} at low temperatures, 589
superconductivity of GIC with Li, Na and K, 455
synthesis, stability and structure of GIC with Li, Na and K, 47
temperature induced collapse of $Li(THF)_x$ complexes in $Li(THF)_{2.13}C_{12}$ graphitide, 33
tritium behavior in neutron irradiated GIC (LiC_6), 695
Lithium secondary battery
and electric double layer capacitor using C fibers electrode, 739
Low-dimensional solids
design of new, 597
Low-temperature absorption
of H_2 and D_2 on KC_{24} prepared from natural graphite, formulation of isotherms for, 329

Madelung energy
and Madelung constant of real and of hypothetical first stage GICs, 279
Magnetic acceptor GICs
transport properties in, 537
Magnetic behaviour
of stage-1 $NiCl_2$ GIC, 525
Magnetic intercalation compounds
transport properties of, 543
Magnetic properties
of first-stage Ni chloride GICs, 531
of stage-1 $NiCl_2$–GICs, 519

Magnetism
of $CoCl_2$ intercalated in graphite studied by elastic and inelastic neutron scattering, 513
Magneto-quantum and topological studies on Fermi surface of GICs, 373
Manganese
$Mn(pyr)(aq)^{2+}$ and pyridine intercalated $Cd_2P_2S_6$ lattices; mechanism of intercalation and perturbation of host lattice, 653
Mercury
anisotropic superconductivity in C_4KHg–GICs, 449
$HgCl_2$ intercalated graphite, *c*-axis resistance of, as function of temperature and pressure, 485
Metal chloride
–GICs
nucleation process of, 85
structural characteristics of, 223
structure of stage-1 and stage-2 MCl_2, 211
intercalated graphite, transport studies on some, and corresponding bi-intercalation compounds, 473
staging in intercalation of, in graphite, 67
Metal halide
GICs, preparation of, by intercalate exchange, 73
Metallic fluorides
chemical and electrochemical reduction of GICs of, 97
Microcrystalline structure
effect of, on transport properties of pristine and AsF_5-intercalated, highly-oriented, pyrolytic graphite, 491
Molten salt systems
intercalation reactions in, 15
Molybdenum
formation of GICs from trichloroacetic acid and trichloroacetic acid chloride solutions containing Mo compounds, 145
high stage hetero-structure GICs in acceptor ($MoCl_5$) and donor (K) ternary system, 205
intercalation of Mo oxide nitrate in graphite, 127
Mössbauer study
^{129}I-, of charge transfer in ICl– and IBr–GICs, 405

Neutron scattering
magnetism of $CoCl_2$ intercalated in graphite studied by elastic and inelastic, 513
structure and dynamics of C_8AsF_8, 353
Nickel
magnetic behaviour of stage-1 $NiCl_2$ GIC, 525
magnetic properties
of first-stage Ni chloride GICs, 531
of stage-1 $NiCl_2$–GICs, 519
Nitrate
graphite nitrate compounds; graphite–N_2O_5 system, 115
reactions of hydrous nitrate melts with graphite, 121
NMR
^{13}C, on GICs, new results in, 569
^{133}Cs, studies on first-stage CsBi–GICs, 577
^{19}F, on stage-2 P fluoride GICs, 583
possible origins of high temperature superconductivity by, of fluorinated $YBa_2Cu_3O_x$ samples; teaching for graphite compounds, 461
NMR chemical shift anisotropy
guest–host interactions in hydrated layered chalcogenides as studied by, 659
Nuclear quadrupole interaction
of $^{111}In(EC)^{111}Cd$ and $^{181}HF(\beta^-)^{181}Ta$ in intercalation compound In_xTaS_2, 647
Nucleation
system graphite/In chloride/Cl; threshold pressures and intercalate, 91
Nucleation process
of metal chloride–GICs, 85

Optical reflectivity
graphite and GICs under pressure; Raman modes, and phase changes, 293
Order–disorder phase transition
conduction carriers spin resonance experiments in $AlCl_3$–GICs stage 2 reveal, 557
Ordering
in $SbCl_5$-intercalated graphite, ultrasonic investigations of kinetics of, 335

Palladium
GICs of $PdCl_2$; structural investigations, 199
Perchloric acid
and sulfuric acid GICs, hydrolysis of, 133
Phase changes
graphite and GICs under pressure; Raman modes, optical reflectivity, and, 293
Phase diagrams
p–T, of $SbCl_5$ intercalated graphite, 187
Phase transition(s)
conduction carriers spin resonance experiments in $AlCl_3$–GICs stage 2 reveal order–disorder, 557

in first stage graphite–Cs–Sb intercalation compounds, above room temperature, 365
of graphite–Br intercalation compounds, pressure-induced, 359
Phasing
of charge density wave onto lattice in 1T-TaS_2, 635
Phosphorus
^{19}F NMR on stage-2 P fluoride GICs, 583
$Mn(pyr)(aq)^{2+}$ and pyridine intercalated $Cd_2P_2S_6$ lattices; mechanism of intercalation and perturbation of host lattice, 653
Physintercalation
high temperature into 2nd stage CsC_{24}, 59
Polarization dependence
of IR-active modes of pyrolytic graphite (HOPG) and K–HOGP intercalation compound, 443
Polyacetylene
electrical properties of p-doped highly-oriented, 671
staging in K-doped; *in situ* X-ray diffraction, 683
structural variations of highly-oriented, upon doping with $GaCl_4^-$, 677
Polymers
conducting, and intercalation, 617
Polyoxometalate anions
layered double hydroxides pillared by; EXAFS studies and chemical synthesis, 609
Potassium
alkali metal–graphite compound $K_{1-x}Rb_xC_8$, local structure in ternary, studied by X-ray absorption, 261
anisotropic superconductivity in C_4KHg–GICs, 449
band structures of ternary intercalation compounds C_8KH_x, 429
ellipsometry of graphite and C_8K intercalation compound between 5 and 30 eV, 417
formulation of isotherms for low-temperature absorption of H_2 and D_2 on KC_{24} prepared from natural graphite, 329
high stage hetero-structure GICs in acceptor ($MoCl_5$) and donor (K) ternary system, 205
–HOPG intercalation compound, polarization dependence of IR-active modes of pyrolytic graphite (HOPG) and, 443
staging in K-doped polyacetylene; *in situ* X-ray diffraction, 683
superconductivity of GIC with Li, Na and K, 455
synthesis, stability and structure of GIC with Li, Na and K, 47
Preparation
and characterization of W oxide fluoride and W fluoride–GICs, 103
and properties of vapor grown graphite, 151
Pressure
c-axis resistance of $HgCl_2$ intercalated graphite as function of temperature and, 485
Pressure-induced phase transitions
of graphite–Br intercalation compounds, 359
Pyridine
$Mn(pyr)(aq)^{2+}$ and pyridine intercalated $Cd_2P_2S_6$ lattices; mechanism of intercalation and perturbation of host lattice, 653
Pyrographite
electrochemically intercalated, in-plane conductivity of, 467
Pyrolytic graphite (HOPG)
polarization dependence of IR-active modes of, and K–HOPG intercalation compound, 443

Quasi-two-dimensional conductors
theory of de Haas–van Alphen effect in, 393

Raman modes
graphite and GICs under pressure; optical reflectivity, and phase changes, 293
Raman spectroscopy
measurement of intercalant vibrations using, 437
Rare earth metals
high stage GICs of, and alkali-metal vapor-transport technique, 53
Reaction mechanisms
Cs–Sb and Cs–As intercalated graphite, 9
Resistivity
of Br intercalated graphite fibers, effect of length and diameter on, 745
Rhenium
effect of Cs and Ba adsorption on electronic properties of C films adsorbed on metals (Ir, Re), 497
Rubidium
alkali metal–graphite compound $K_{1-x}Rb_xC_8$, local structure in ternary, studied by X-ray absorption, 261
GIC, kinetics of first-order transition in stage 1, 323

Scanning tunneling microscopy
surface structure of GICs resolved in real space by, 175
Silver
electrointercalation of Ag into 2H-TaS_2; *in situ* observation of reaction, equilibration and homogenisation, 629
intercalation channels in Ag–TiS_2, 623
Sodium
GIC with Li, Na and K
superconductivity of, 455
synthesis, stability and structure of, 47
Spin fluctuations
and excitations in 2D XY-ferromagnet; $CoCl_2$ in graphite, 505
Spin-lattice relaxation
of ^8Li in LiC_{12} at low temperatures, 589
Spin resonance experiments
conduction carriers, in $AlCl_3$–GICs stage 2 reveal order–disorder phase transition, 557
Stability
of fluoride or F–GICs, structural factors on, 237
of GIC with Li, Na and K, 47
Staging
in intercalation of metal chlorides in graphite, 67
in K-doped polyacetylene; *in situ* X-ray diffraction, 683
Staging disorder
in GICs, 273
Staging transition
in H_2SO_4–GICs, kinetics of, 315
Structural characteristics
of GICs of metal chlorides, 223
Structural factors
on stability of fluoride or F–GICs, 237
Structural investigations
of GICs, new correction factor for X-ray intensities in, 285
of GICs of $PdCl_2$, 199
Structural study
of two graphite–Cs–As lamellar alloys (stages 1 and 2), 249
Structural variations
of highly-oriented polyacetylene upon doping with $GaCl_4^-$, 677
Structure
and dynamics of C_8AsF_8; neutron scattering study, 353
of electrochemical reduced graphite–Co compound, 267
of GIC with Li, Na and K, 47
high stage hetero-, GICs in acceptor ($MoCl_5$) and donor (K) ternary system, 205
in-plane of stage-2 $SbCl_5$ GICs, 193
of intercalated metallic sheets in lamellar graphite–Cs–Sb phases, 255
local, in ternary alkali metal–graphite compound $K_{1-x}Rb_xC_8$ studied by X-ray absorption, 261
of $SbCl_5$ intercalated graphite, 187
of stage-1 and stage-2 MCl_2 GICs, 211
surface, of GICs resolved in real space by scanning tunneling microscopy, 175
Sulfur
$Mn(pyr)(aq)^{2+}$ and pyridine intercalated $Cd_2P_2S_6$ lattices; mechanism of intercalation and perturbation of host lattice, 653
Sulfuric acid
fluoride/fluoride and fluoride/sulfuric acid graphite bi-intercalation compounds, 109
GICs, hydrolysis of perchloric acid and, 133
intercalation of, into graphite by chemical oxidation, potential survey of, 139
kinetics of staging transition in H_2SO_4–GICs, 315
X-ray diffraction in synthesis of H_2SO_4–GICs, *in situ* observation, 341
Superconductivity
anisotropic, in C_4KHg–GICs, 449
of GIC with Li, Na and K, 455
possible origins of high temperature, by NMR studies of fluorinated $YBa_2Cu_3O_x$ samples; teaching for graphite compounds, 461
Synthesis
Cs–Sb and Cs–As intercalated graphite, 9
of GICs with alkali metal hydrides, 27
of GIC with Li, Na and K, 47
of H_2SO_4–GICs, *in situ* observation of X-ray diffraction in, 341
layered double hydroxides pillared by polyoxometalate anions, EXAFS studies and chemical, 609

Tantalum
chemical lithiation of 1T-TaS_2, *in situ* study, 641
electrointercalation of Ag into 2H-TaS_2; *in situ* observation of reaction, equilibration and homogenisation, 629
nuclear quadrupolar interaction of $^{111}In(EC)^{111}Cd$ and $^{181}HF(\beta^-)^{181}Ta$ in intercalation compound In_xTaS_2, 647
phasing of charge density wave onto lattice in 1T-TaS_2, 635

Temperature
c-axis resistance of $HgCl_2$ intercalated graphite as function of, and pressure, 485
role of, and entropy; thermodynamic conditions of intercalation, 21
Temperature induced collapse
of $Li(THF)_x$ complexes in $Li(THF)_{2.13}C_{12}$ graphitide, 33
Tensile properties
of intercalated pitch mesophase C fibers, 733
Thermodynamic conditions
of intercalation; role of temperature and entropy, 21
THF complexes
temperature induced collapse of $Li(THF)_x$ complexes in $Li(THF)_{2.13}C_{12}$ graphitide, 33
Tin
local environment of Sn in Sn fluoride–GIC, 231
Titanium
intercalation channels in $Ag-TiS_2$, 623
Transition
kinetics of first-order in stage 1 Rb GIC, 323
Transport properties
in magnetic acceptor GICs, 537
of magnetic intercalation compounds, 543
of pristine and AsF_5-intercalated, highly-oriented, pyrolytic graphite, effect of microcrystalline structure on, 491
Transport studies
on some metal chloride intercalated graphite and corresponding biintercalation compounds, 473
Trichloroacetic acid
formation of GICs from, and trichloroacetic acid chloride solutions containing Mo compounds, 145
Tritium behavior
in neutron irradiated Li GIC (LiC_6), 695
Tungsten
preparation and characterization of W oxide fluoride and W fluoride–GICs, 103

Ultrasonic investigations
of kinetics of ordering in $SbCl_5$-intercalated graphite, 335

Vapor grown graphite
preparation and properties of, 151
Vapor-transport technique
high stage GICs of rare earth metals and alkali-metal, 53

X-ray absorption
local structure in ternary alkali metal–graphite compound $K_{1-x}Rb_xC_8$ studied by, 261
X-ray absorption spectroscopy
of $AuCl_3$–graphite, 217
X-ray diffraction
of $AuCl_3$–graphite, 217
and computer simulations for partially disordered systems, 165
staging in K-doped polyacetylene; *in situ*, 683
in synthesis of H_2SO_4–GICs, *in situ* observation, 341
X-ray intensities
new correction factor for, in structural investigations of GICs, 285
X-ray scattering
inelastic synchrotron, information about band structure of LiC_6 from, 423

Yttrium
NMR studies of fluorinated $YBa_2Cu_3O_x$ samples, possible origins of high temperature superconductivity by; teaching for graphite compounds, 461
